Why deal with a Canadian full-service dental distributor?

It's simply good business. Ash Temple has been committed to Canadian dentistry since 1895.

Generations of dentists have known Ash Temple as a dependable source for dental supplies, equipment and services.

Ash Temple supports local associations, advertises in Canadian dental journals, exhibits at Canadian conventions and provides "Equity Grants" to National and Provincial associations and dental schools.

As a Canadian corporate citizen, we support the Canadian economy and pay

taxes in Canada. Ash Temple branch personnel and their families are participants in their local economies.

By supporting your Canadian full-service distributor, you reinforce *your* local economy, promote local employment, and improve Canada's competitive position.

Ash Temple Limited, your logical Canadian source of supply from coast to coast!

What's so distinctive about Ash Temple service?

At Ash Temple, we recognize that when you need supplies, or your equipment malfunctions, you can't afford to wait. You need fast, efficient response.

That's why it's good to know you can rely on the people at Ash Temple.

Ash Temple's team of experts is composed of people who combine seasoned experience with the latest knowledge of industry developments.

Our service commitment is a combination of three important elements:

- An outstanding dedication to promptness and efficiency on the part

of all our staff from coast-to-coast.

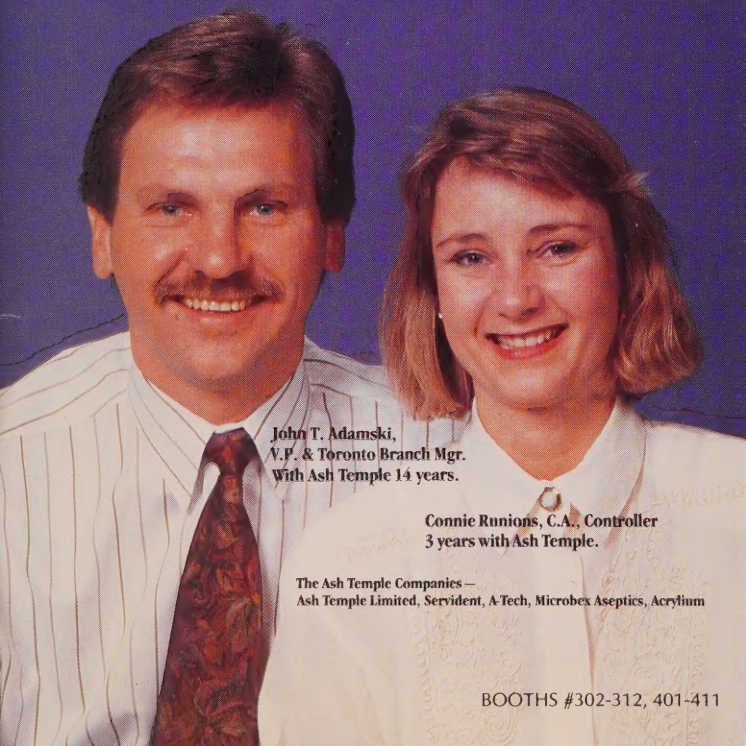

- A distribution infrastructure devoted to providing consistent reliability with high order fill rates unrivalled in Canada.
- An enviable reputation earned over years of service to the Canadian dental profession.

Ash Temple can provide the service you require from within your local community.

Call us. We're there when you need us.

TORONTO ACADEMY OF DENTISTRY

OUR ACADEMY

The ACADEMY OF DENTISTRY, formerly the Toronto Dental Society, has been functioning continuously since 1890. It has provided leadership and service to both the profession and the community, and will continue to do so in the future.

The OBJECTS of the Academy are:

1. Advancement of the art and science of dentistry.
2. To promote the highest ideals of dental practice.
3. Cultivation of harmony and good fellowship among its Fellows, and among the members of the dental profession generally.

Some of the specific services provided are as follows:

1. The Annual WINTER CLINIC.
2. After hours EMERGENCY TREATMENT service for the public.
3. The Annual WINTER CLINIC/INFORMATION BOOK, a directory of dental organizations.
4. PUBLIC RELATIONS, a secretary to answer the public's queries and complaints.
5. An ELECTED COUNCIL, representing all Metro Toronto dentists and their local component societies.
6. CO-ORDINATION of dental and fellowship functions within Metro Toronto.
7. DENTAL MEETINGS with excellent programs and clinicians.
8. Assistance in formation of new STUDY GROUPS.
9. HONOURARY LIFE MEMBERSHIP to recognize outstanding dentists.
10. Fellowship activities such as the Annual GOLF TOURNAMENT, CURLING BONSPIEL, and SKI DAY.
11. MEDIATION services for the public.
12. COMMUNICATION with dental auxiliary organizations.
13. Provides an ASSOCIATE PLACEMENT service.

THIS IS OUR ACADEMY.
KEEP IT STRONG.
SUPPORT IT, ENJOY IT.

IMPORTANT INFORMATION

- **RCDS ACCREDITATION**

- 3 Credits for Attendance

- 3 Credits for any Half-Day Presentation

A total of 6 RCDS credits may be attained for the day, regardless of how many lectures you attend.

Attendance accreditation will be given out when you pick up your badge. There will be a system for recording individual clinic attendance. Remember you can only accumulate 3 lecture hour credits over and above the 3 attendance credits.

- **ACADEMY OF GENERAL DENTISTRY — 6 Credit Hours**

- **REGISTRATION — All forms are at the front of this book.**
Read registration forms carefully and send to the appropriate association (Academy of Dentistry, ODNA, ODHA)

Greetings

Peter Tonisson
B.Sc., D.D.S.

Flavio Turchet
D.D.S.

We would like to take this opportunity to welcome you to the 1994 Toronto Academy of Dentistry's Winter Clinic!

This excellent day of continuing education and fellowship has been arranged for you through the hard work and effort by the members of the Winter Clinic Committee, which includes not only dentists, but representation from the ODNA, ODHA, Dental Industry Association of Canada and The Association of Registered Dental Technicians of Ontario.

As the Royal College of Dental Surgeons continues to require that Ontario dentists attain continuing education credits, we are glad that the Winter Clinic can provide these credits, while maintaining the same enjoyable and interesting format that the convention has had in the past.

All aspects of dentistry will be covered — from traditional yet timeless topics, to new innovative subjects. This year we are offering a **New Products Lecture Forum** where 7 dental companies will discuss interesting new products.

As always, there will be a large number of diverse manufacturers and suppliers who will display their newest products and answer any questions that you may have. The Toronto Academy of Dentistry appreciates the support and involvement of the dental industry. Exhibit hours have been extended this year so you have adequate time to visit the exhibit hall.

A **Silent Auction** will be held on the Exhibit Floor. All proceeds to The Hugh MacMillan Children's Foundation.

We hope that this year's Winter Clinic is both informative and enjoyable; a learning and a social experience for the entire dental team.

Greetings from the Ontario Dental Nurses and Assistants' Association

Diane Burman
CDA/CDR
President

It is my pleasure to invite the members of the dental health care team to the Toronto Academy of Dentistry's Annual Winter Clinic to be held this year on November 23, 1994 at the Metro Toronto Convention Centre, Toronto, Ontario.

Winter Clinic affords dentists, dental hygienists, dental assistants and dental receptionists the opportunity to continue their dental education, renew acquaintances and meet new people.

This year's Winter Clinic hosts a number of group clinics, table clinics, scientific exhibitions and much more.

I look forward to seeing you and your team at the Winter Clinic; drop by our membership booth and say hello.

Welcome from the Ontario Dental Hygienists' Association

Barb Gibb
President

Welcome to the 57th Annual Academy of Dentistry's Winter Clinic.

Life long learning is part of the responsibility that comes with the privilege of being a professional. Winter Clinic affords us an occasion to fulfil this commitment in the company of our oral health team members and dental hygiene colleagues — to the ultimate benefit of our clients.

On behalf of the Ontario Dental Hygienists' Association (ODHA) members, I wish to thank Barbara Greenglass, ODHA Winter Clinic Official Representative, Raisyl Wagman of the Toronto Academy of Dentistry and their respective committees for planning and providing us with this opportunity.

Dental Industry Association of Canada Welcome

Eva Young
President

On behalf of the Dental Industry Association of Canada, I would like to thank the Toronto Academy and its members for allowing us, as exhibitors and partners, to join you in celebrating the 57th Annual Toronto Winter Clinic Meeting.

The tireless efforts of your Committee in organizing yet another excellent selection of scientific topics along with the implementation of some new and creative marketing ideas such as the "New Products Forum," "Promotional Display Tower," and extended exhibit hours will help to ensure that the Toronto Winter Clinic continues to be regarded as one of the most progressive, enjoyable and highly respected meetings in the Dental Industry.

Many of the retail, service and manufacturing companies who have elected to take part in this year's Winter Clinic have worked hard to prepare a host of special promotions and innovative product displays specifically for this occasion. Their intent is to inform Academy members of the latest in technological advancements, new products and procedures and enhanced business management tools. Visit the exhibit floor to find out about them — as well as take advantage of some "too good to be true" special features on many of the most popular and necessary products used in your dental practices.

Positive, ongoing support and communication between dental exhibitors and dental professionals — between D.I.A.C. and the Toronto Academy of Dentistry — remains one of the foremost contributors to our mutual progress and continuing success. The nurturing of our symbiotic relationship will ensure that we continue in our ability to positively influence the clinical and social advancements made in the provision of dental health care services to the Canadian public.

We are proud and pleased to be partners in your success, and wish you a highly successful 1994 Winter Clinic Meeting.

Greetings from the Association of Registered Dental Technicians of Ontario

**Andre Theberge, RDT
President**

Greetings to all dental professionals and welcome to another Winter Clinic. As all of you are aware, the health review legislation is continuing its long and arduous grind to a somewhat indistinct conclusion. As president, I am privy to many conversations and documentations regarding many health professions including dental technology and it seems to me that every council has its challenges to overcome.

Nevertheless, as far as dental technology is concerned, I think, regrettably, that we have been granted professional status with the inherent responsibility, but unaccompanied by the privileges enjoyed by our counterparts in the province. The scenario is like having obtained a drivers license with the responsibility of insurance and adherence to government control on the operation of a vehicle only to find out that that same government would like to have the public at large have the greatest amount of choice in transportation and so allows anyone access to drive. It just doesn't make sense. All of this is cleverly concealed in the shroud of the public welfare. I wonder, how safe is the public if licensed RDTs are undermined, with the government's knowledge, by untrained, unlicensed and uninsured individuals? To support such practices is to enfeeble all that we profess is true in dentistry today!

SILENT AUCTION AT THE WINTER CLINIC

ALL PROCEEDS TO THE HUGH MACMILLAN REHABILITATION CENTRE

It's your chance to bid on treasures and help the kids!

• *Blue Jays* • *Argos* • *Maple Leafs* • *And Much More Stuff!*

The Auction will be set up in Exhibit Hall "A" and will run from 9:00 a.m. to 6:00 p.m.

KATY

1994 Spokesperson for the Hugh MacMillan Children's Foundation

The Toronto Academy of Dentistry is proud to support the Hugh MacMillan Rehabilitation Centre through fundraising events such as our 1990 Centennial Celebration, Golf Tournaments and now this Silent Auction.

Recently the Toronto Academy of Dentistry has purchased for the Hugh MacMillan Centre an ultrasound machine to be principally used by the staff of the Dental/Cleft Lip and Palate Program. It would also be used by the Orthopaedic department and the Rehabilitation Hospital at the Centre.

Benefits of this machine — A simple benefit for the children — it helps without hurting. Ultrasound permits clean imaging and practical assessments of the swallow mechanism without requiring invasive and sometimes painful procedures. This mechanism is responsible for most of the drooling and feeding disorders experienced by the clients of the Dental/Cleft Lip and Palate Program. The use of the ultrasound machine will also eliminate the unnecessary risk of extensive x-rays for these young clients.

The Dental/Cleft Lip and Palate Program Team is the only group in North America currently investigating the use of ultrasound as a replacement for x-ray equipment. The team expects to have practical results of this state-of-the-art ultrasound technology within 12-18 months, as both a research and treatment tool for children with neuromuscular disorders.

All funding for this equipment will come from the Toronto Dental Endowment Fund, Inc.

Handling Key Time Management Problems

Jennifer M. de St. Georges

Jennifer is an internationally renowned dental practice management speaker who provides the "nuts and bolts of management in a highly motivational, practical, fast-paced and entertaining manner.

Both of Jennifer's lectures are of interest and importance to the entire dental team. These lectures are limited attendance. See Registration Form.

Room: Theatre

Time: 9:30 a.m. - 12:00 noon

Chairman: Dr. Peter Markle

SYNOPSIS

Time management is the key and foundation to the management of a successful practice. Jennifer will tell you how to handle three key scheduling concerns: emergencies, the morning meeting and the necessary verbal skills needed to handle scheduling problems. You will leave the seminar with the confidence to handle these problems with patients in a highly effective, caring yet professional manner.

Working with Patients Objections and Other Emotional Issues

- Eliminate confirmation calls to patients
- Reduce no shows, and learn if and when to charge if they occur
- Reducing "cancel short notice" appointments
- Solutions to handling patients who arrive late, and "walk-ins"
- Handling patients when the practice is running behind schedule
- Multiple family appointments, how to handle these requests
- Handle parents who want their children to come at the end of the day
- Patients who say "I can only come at the end of the day!"
- Patients who are always late
- Patients and doctors "who chat" solve the problem
- Walk in patients, both emergencies and patients of record

continued

continued

How to Handle Emergencies — The Nine Golden Rules

Jennifer will give you valuable information to enable you to look forward to scheduling emergency patients within your defined time management needs in a win-win environment.

25 Benefits of a Five Minute Morning Meeting — The Key for Your Stress Free Day

Take the “managing by crisis” scenario out of your life. The morning planning meeting is the foundation of your practice day. By anticipating problems, potential pitfalls are eliminated and surprises reduced. Everyone benefits.

3 RCDS CREDITS

Communicating Financially With Your Patients or How To Ask For Money, Get It, and Still Feel Comfortable

Jennifer M. de St. Georges

Room: Theatre
Time: 2:15-4:45 p.m.
Chairman: Dr. Ron Traub

SYNOPSIS

This seminar will have you returning to your practice with a renewed commitment to increase financial communication with your patients by teaching you all the verbal skills and effective financial management tools needed to implement successful, practical, financial policies in the practice. The inclusion of the **entire staff** will ensure increased communication between the clinical and administrative areas.

After this seminar you will know how to handle...

- Patient's emotional questions such as “why does the insurance company say you are overcharging for the area?”
- The telephone shoppers ... make “how much does the doctor charge for a crown?” your favourite kind of call!
- Asking for money at the front desk. Acquire skills for taking control of the situation
- Identify and solve the 18 major weaknesses in financial management
- Identify the dentist's involvement in financial communication
- Establish policies for handling divorce, children, returned cheques
- Let effective records protect you from financial surprises
- Insurance patients need to accept responsibility for their coverage ... how to do it
- Use time limits on treatment estimates to your advantage

AND MORE

Bring your staff and take advantage of Jennifer's expertise!

3 RCDS CREDITS

Adhesion Dentistry

Raymond Bertolotti
D.D.S., Inc.

Dr. Bertolotti is currently Clinical Professor in Biomaterials Science at the University of California as well as in private practice. His "firsts" include introducing "total Etch" to North America, Panavia, intraoral tin plating and intraoral sand blasting. He is an international speaker and textbook author.

THIS IS AN ALL DAY SEMINAR

Room: 202BD
Times: 9:30-12:00 noon, 2:15-4:45 p.m.
Chairmen: Dr. Godfrey Beber, Dr. Jerry Weisberg

SYNOPSIS

We are witnessing a revolution in restorative dentistry. The ability to adhere to virtually any intraoral surface — dentin, base and noble metals, porcelain and acrylic, with bond strengths exceeding etched enamel bonds — allows many new clinical procedures. After a presentation of the procedures for adhesion to virtually any surface, a variety of clinical examples will illustrate their use as outlined below. A rationale for material selection will be given by brand name.

Total Etch, Total Seal, Total Success

1. Dentin smear layers and permeability
2. Why the taboo on dentin etching is wrong
3. Rational dentin/enamel bonding — total etch
4. Kanca technique vs. Fusayama technique
5. Wet field bonding with Bluma or All Bond
6. Commercial product selection/evaluation
7. Thermal sensitivity is not from lack of base
8. Disappearing dycal, pH 12 cottage cheese
9. Problem free, first class posterior composites. All the problems solved!

Metal Adhesives

1. Direct metal adhesion
2. Product selection/evaluation by brand name
3. Eliminate failure on Maryland Bridges
4. Intraoral sand blasting and tin plating for adhesion

continued

continued

Porcelain Repair

1. Porcelain all missing, mixed porcelain-metal failure, all-in-porcelain fracture: Successful repairs
2. Clearfil and All Bond: universal adhesion systems
3. Prosthodontic application
4. Fact or fiction: Multi-Purpose Bonding Agents

Expanded Applications: The "Bondodontist"

1. Bonded amalgam fillings and cores
2. The all-bonded post and core
3. Gold to gold adhesion
4. Porcelain veneers to gold crowns, intraorally
5. The true adhesion onlay (no inlay)

Morning and/or Afternoon

3 RCDS CREDITS

RCDS CREDITS FOR WINTER CLINIC

You will receive 3 credits for attendance at Winter Clinic.

You can attain 3 additional credits for any half or full day lecture.

(The system for recording these credits will be announced at the lectures)

The total RCDS credits to be allotted for Winter Clinic is 6.

The First Impression Is The Best Impression

Dr. Ronald A. Feinman
D.M.D.

Private practice of cosmetic general dentistry and removable prosthetics. Visiting Scientist at Hebrew University School of Dental Medicine, Jerusalem; Adjunct Assistant Professor, School of Dentistry, Case Western Reserve University. Lecturer at most major dental meetings in U.S. and internationally.

Room: 203BD

Time: 9:30 - 12:00 and 2:15 - 4:45 p.m.

Chairmen: Dr. Murray Wagman and Dr. Jeff Kirshenbaum

MORNING SESSION SYNOPSIS

Dr. Ronald Feinman, in his typical, practical fashion, will present a special day which will make both you and your staff excited about the real practice of dentistry. Dr. Feinman will cover simple and predictable impression and tissue management techniques which ensure accurate final restorations. His discussions on marketing, intra-oral videos, laser, gummy smiles and restorative procedures will enable you to return to the office with immediate and rewarding results. **If you have not had the opportunity to spend the day with this exciting clinician within the past 12 months, you owe it to yourself and your staff to attend this seminar!!**

Esthetic Options — Changing Position, Shape & Colour

AFTERNOON SESSION SYNOPSIS

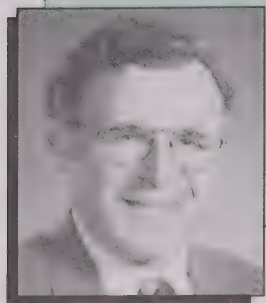

Porcelain laminates, bonded onlays, bleaching and direct composite resins offer a cosmetic alternative for immediate changes in the general dentist's office.

Dr. Feinman will discuss the pros and cons of the various treatment options available. His in-depth lecture will include:

1. Porcelain laminates and composite onlays
2. Why gold is better
3. Repairs, problem solving, and salvaging esthetic dilemmas
4. How your staff is your best promotion
5. Bleaching today
6. Direct composite bonding still lives

Dr. Feinman's presentations are being sponsored by Wright Dental Canada Ltd., distributor of Ultradent products.

3 RCDS Credits — Morning and/or Afternoon

All The Medicine You Wanted To Know Without Going to Medical School

Dr. Myer Leonard

Head of Oral and Maxillofacial Surgery, Hennepin County Medical Centre and Professor at the University of Minnesota. Lecturer at all the major meetings in the United States as well as internationally.

Room: 206AB

Times: 9:30 - 12:00 noon / 2:15 - 4:45 p.m.

Chairman: Dr. Paul Chapnick

SYNOPSIS — MORNING SESSION

Medical knowledge seems huge and intimidating. The aim of this talk is to attempt to reduce it to a comprehensible and succinate account that can easily be used by any practitioner in assessing the health status of his/her patients. A particular emphasis will be placed on correlating physiology and clinical symptoms in an entertaining manner. Also to be emphasized are some features of contemporary treatments particularly in heart disease.

This talk is not "Oral Manifestations of Systemic Disease" nor is there any attempt to discuss therapeutics and their effect on dental treatment.

SYNOPSIS — AFTERNOON SESSION

It is estimated that 30 million teeth described as "simple" are extracted each year. Not all of these turn out to be so simple; some of them break, sometimes in getting out the root the tissues tear, and there is a lot of tears, toil, sweat and remorse. This lecture concentrates on some factors associated with assessment of which teeth to refer and defer; some techniques on forceps manipulation, practical hints on flaps and even how to remove broken teeth without a flap in under 3 minutes. Emphasis will be placed on the recognition of complications and how to manage them and also some words on the litigation problem which haunts everyone who is in practice.

A short discussion on biopsy, when it is indicated and how to do some simple ones will conclude the session.

This lecture does not cover third molar extraction, nor pharmacology.

Endodontic — Periodontic Interrelationships

Herbert Schilder
D.D.S.

Professor and Chairman of the Department of Endodontics at Boston University Goldman School of Graduate Dentistry. Dr. Schilder is a world famous practitioner and educator in Endodontics; author of many scientific articles and chapters in textbooks, and international lecturer. He also maintains an active private practice of Endodontics.

This lecture will be of interest to the general practitioner as well as the specialist.

MORNING SESSION ONLY

Room: 206CD

Time: 9:30 a.m. - 12:00 noon

Chairman: Dr. Lionel Lenkinski

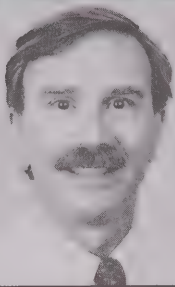

SYNOPSIS

This program outlines the multiple interrelationships of Endodontics and Periodontics, describes methods for differential diagnosis, and prescribes specific treatment procedures in a wide variety of clinical situations.

Frequently observed problems in the diagnosis and treatment of teeth with combined endodontic/periodontic lesions will be described. Included will be the role of Endodontics in hemisection and root amputation in the management of teeth with bifurcation and trifurcation lesions. Also demonstrated will be the role of auxiliary root canals in the treatment of furcal and infrabony lesions of Endodontic origin.

The Toronto Academy of Dentistry thanks Tulsa Dental Products and the Ontario Society of Endodontists for their co-sponsorship of Dr. Schilder's presentation.

3 RCDS Credits

Caries Testing and Pediatric Dentistry

Andrew Sonis
D.M.D.

Associate Clinical Professor, Harvard School of Dental Medicine; Associate in Pediatric Dentistry, The Children's Hospital, Boston; Associate in Surgery/Staff Orthodontist, Brigham and Women's Hospital, Boston; Infection Control Committee, The Children's Hospital; Consultant in Pediatric Dentistry, U.S. Army; Dental Coordination, Long-Term Follow-Up Clinic, Dana Farber Cancer Institute, Boston.

Major Research Interests:

- Oral complications of cancer therapy
- Oral manifestations of systemic disease
- Fluoride-releasing restorative materials

Room: 206F

Time: 9:30 - 12:00 noon / 2:15 - 4:45 p.m.

Chairpersons: Cheryl Cancelli and Dr. Paul Andrews

This is a three-part presentation with adequate time for questions

SYNOPSIS

1. Dental Caries: Diagnosis and Risk Factors in the 90's

Our understanding of dental caries as a dynamic process has made diagnosis even more clinical than in the past. This lecture will attempt to address advances in dental caries diagnosis, and discuss the state of the art and science as to who is at risk of developing dental decay, so the clinician can develop individualized preventive strategies and comfortably answer the question "when does a cavity require restoration."

2. A Review of Some Common and Not So Common Clinical Oral Pathologic Conditions in Children

This lecture will review oral pathologic conditions affecting children that the dental practitioner may encounter in clinical practice. It will focus on clinical findings, the development of differential diagnoses, and therapeutic approaches to the management of these conditions.

3. Occupational Risks in Pediatric Dentistry

Occupational risks relative to dentistry are related to three variables: the patient population, the types of procedures performed, and the precautions taken by the dental healthcare worker. This lecture will explore each of these variables and put them in proper perspective relative to other healthcare workers.

The Toronto Academy of Dentistry thanks Ivocar-Vivadent for their sponsorship of Dr. Sonis' lecture.

3 RCDS Credits — Morning and/or Afternoon

New Horizons In Clinical Periodontics

Jon B. Suzuki
D.D.S., Ph.D.

Professor and Dean, University of Pittsburgh, School of Dental Medicine, Chief of Hospital Dentistry, Presbyterian and Montefiore University Hospitals; Professor Periodontics and Microbiology. Clinical Professor of Genetics, Graduate School of Public Health. On Faculty of The Johns Hopkins University School of Medicine. Consultant for the Advisory Council in Immunology for the National Aeronautics and Space Administrations, and for the Food and Drug Administration.

Room: 205B

Times: 9:30 - 12:00 noon and 2:15 - 4:45 p.m.

Chairmen: Dr. David Hanmer and Dr. Gerry Pearson

SYNOPSIS

This course will be presented in two parts:

Morning Session — Diagnosis
Afternoon Session — Treatment

Course Outline

1. Introduction to Periodontal Disease
2. Current Concepts of Plaque Development
 - Non-specific
 - Specific
 - Succession
3. Host Response
4. Diagnosis and Classification
 - Adult Periodontitis
 - Early Onset Periodontitis
 - Prepubertal (LP, GP)
 - Juvenile (LJP, GJP)
 - Rapidly Progressive
 - Periodontitis Associated Systemic Disease
 - Necrotizing Ulcerative Periodontitis
 - Refractory Periodontitis
5. Periodontal Treatment Planning
 - Initial Tx/Non-Surgical
6. Concluding Remarks

3 RCDS Credits — Morning and/or Afternoon

Oral Cancer: The Essential Role Of The Dentist In Early Detection

Pier J. Cipriani
D.D.S., M.S.

Private practice, Washington Crossing, PA; President of CTM Associates, an oral pharmaceuticals research and product company. Developer of OraScan. Consultant, Zila Pharmaceuticals, Inc., Phoenix, AZ; Consultant, Germiphene Corp., Brantford, Ont.

MORNING SESSION ONLY

Room: 205CD
Time: 9:30-12:00 noon
Chairman: Dr. Jack Wasserman

SYNOPSIS

Oral Cancer is one of the most deadly forms of cancer, and its morbidity and mortality have not changed in the last 20 years, due primarily to late stage diagnosis. Studies show that the medical and dental professionals need to be able to discover oral cancers at an earlier stage, when treatment is less invasive, debilitating, and costly. Major public health agencies and cancer societies have encouraged or established programs for early screening and diagnosis, yet there are severe limitations in being able to observe early stage disease. This lecture will focus on:

- The epidemiology of oral cancer
- Current trends in incidence and severity
- Risk factors and risk sites for oral cancer
- The development of new visualization technology to aid in earlier stage discovery
- Research background on the uses of toluidine blue
- Current studies on the use of OraScan
- Econometric forecasts in reducing the morbidity and mortality as well as significantly lowering the health care costs of treating oral cancer utilizing the widespread use of OraScan in a general screening program for patients at high risk.
- Role of the dentist in implementing OraScan screening in their practices, including practice building and malpractice issues.
- OraScan product description and demonstration.

The Academy of Dentistry thanks Germiphene Corp. for their sponsorship of Dr. Cipriani's lecture.

3 RCDS Credits

The Dental Handpiece. What's On it? What's In It? What Flows Out Of It? And What To Do About It Without Damage And Excessive Cost

Robert A. Clappison
D.D.S., F.R.C.D.(C)
Prosthodontist

Private practice in Prosthodontics
Restorative and Dental Materials Consultant
— Oral Health Editorial Board
Examiner in Prosthodontics — Royal College of Dentists
Member of many associations including OSAP — Office
Sterilization and Asepsis Procedures Research Foundation
Director, About Face — A Facial Deformity Support Group

AFTERNOON PROGRAM ONLY

This is an important session for the entire dental team.

Room: 205CD
Time: 2:15 - 4:45 p.m.
Chairperson: Dr. Don Stewart

SYNOPSIS

Heat sterilization of dental handpieces causes many practitioners to experience almost needless handpiece deterioration.

The projected clinic will show the care necessary to ensure that turbine components and handpiece casings survive in good condition for periods equal to or longer than those experienced prior to heat sterilization procedures.

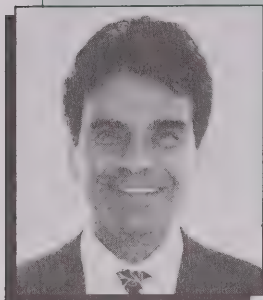

Additional information regarding other aspects of cross contamination control will be discussed.

Knowledge has been available for decades that microbial contaminants exist as biofilms in dental unit waterlines yet little is done to reduce this additional source of cross contamination. "Add-on" and new unit clean water systems and their maintenance will be discussed.

Don't Worry — Be Happy. You can provide to patients from the full spectrum of microorganism — not just HIV and HBV and you can do this with a smile knowing that you have handpiece and dental unit waterline cross contamination under control.

The Toronto Academy of Dentistry thanks Patterson Dental for their sponsorship of Dr. Clappison's lecture.

Fresh Breath — A New Approach to Oral Malodour

Julian S. Geller
D.D.S.

Anne Bosy
R.D.H.

Dr. Julian S. Geller, D.D.S. — Private practice of Children's Dentistry; Member of Staff, Hospital for Sick Children and Associate in Dentistry and Clinical Instructor in Department of Paedodontics, Faculty of Dentistry, University of Toronto, Co-Founder of The Fresh Breath Clinic.

Anne Bosy, R.D.H. — Professor, George Brown College in Instructional Design with emphasis on distance education. Has taught in Dental Assisting, Dental Hygiene and Denturist programs. Co-Founder of The Fresh Breath Clinic.

Room: 201D
Time: 9:30 - 10:45 a.m.
Chairperson: Rene Roxborough

SYNOPSIS

Records show that breath problems date back as far as 1550 B.C. Since these problems were treated with aromatic pastilles and various mouth washes just as they are today, we have made remarkably little progress understanding the causes of oral malodour and the social problems associated with this condition. In addition to a brief introduction to the Fresh Breath Clinic, our presentation will discuss various aspects of this socially significant problem, including the causes and composition of odorous breath, as well as the social erosion and suffering of individuals afflicted with this condition.

The Curse of Carpal Tunnel Syndrome

Greg Anderson
Specialty Medco Inc.

Room: 201D
Time: 11:00 a.m. - 12:15 p.m.
Chairperson: Rene Roxborough

SYNOPSIS

Greg Anderson will be presenting an open forum on Carpal Tunnel Syndrome (CTS) and how it directly affects the dental profession. Topics covered will include the definition of CTS, symptoms and test methods for detecting it. Attention will also be paid to the causes and contributing risk factors that directly affect dental professionals. Along with this risk checklist, an in-depth presentation of preventive strategies will be provided to all attendees.

Clinical Presentation and Treatment of Common Oral Lesions

Dr. Miriam Grushka
PhD, D.D.S.
Associate in Dentistry,
Faculty of Dentistry, U. of T.

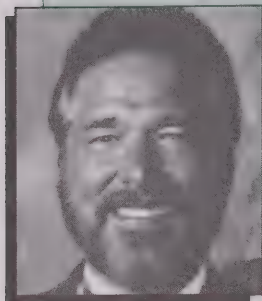

Helen Grad
M.Sc.Pharm.
Clinical Pharmacist/Senior Tutor,
Faculty of Dentistry, U. of T.

Room: 201F
Time: 9:30 a.m. - 10:45 a.m.
Chairperson: Dr. Bob Pick

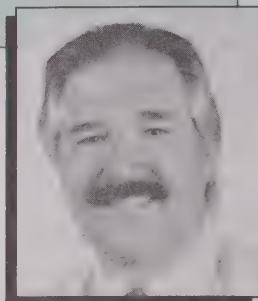

SYNOPSIS

This talk will cover the clinical presentation, etiology and new treatments available for common oral lesions including recurrent aphthous stomatitis (RAS), erosive lichen planus, recurrent candidiasis, denture sore mouth and herpetic lesions. Therapeutic management will include a comparison of the corticosteroids with regard to potency and efficacy along with a review of anti-fungal, anti-viral and antimicrobial agents. A handout will be provided.

Advanced High-Strength Porcelain Crowns and Bonded Porcelain Systems: Clinical Applications and Procedures

John Williams
R.D.T.

Tom Williams
R.D.T.

John Williams, R.D.T. — Clinical and technical expert in Bonded Ceramics. Since 1983, has assisted over 1,000 dentists with bonded ceramics cases. has lectured widely, and has written several articles on bonded ceramics.

Tom Williams, R.D.T. — Technical and clinical consultant for Krest Ceramic Laboratory

Room: 201F
Time: 11:00 - 12:15 p.m.
Chairman: Dr. Bob Pick

SYNOPSIS

Full coverage, all-ceramic restorations now play an essential role in the dental practice of the 90's. The quest for ultimate esthetics with high-strength has led to the dominance of 2 high-tech ceramic systems; Inceram and Empress.

Attendees of this clinic will see a slide presentation illustrating both of these systems. Emphasis will be on case selection, preparation, bonding techniques, materials and armamentarium.

FOR BEST RESULTS, USE REGULARLY.

For results worth smiling about, use KODAK Dental Products.

The reason is simple. We offer a complete line of the most trusted brands in the industry. There's COOK-WAITE Anesthetics. KODAK EKTASPEED Plus and ULTRA-SPEED Films and KODAK Chemicals to develop them. KODAK CLINASEPT Barriers and Barrier Envelopes that help minimize cross-contamination of intraoral films in your daylight loader or darkroom. KODAK T-MAT Extraoral Films, using our exclusive T-GRAIN Emulsion for sharper images with less radiation. Plus KODAK LANEX Screens. Combine the screens with T-MAT Films, and reduce radiation exposure up to 50%. For quality, reliability and great results, choose Kodak.

Call 1-800-465-6325, ext. 36100, for details.

EXHIBIT HALL "A"

NEW PRODUCTS FORUM

An Opportunity to Hear Presentations on Seven New Dental Products

Room 201AB

Each presentation will be 20 minutes

Chairman: Dr. Howard Klaiman

9:30 a.m. — FLUORIDE FOAM

Finally a Fluoride Application that provides 90% uptake using only 1/3 the average dose! Bolton Dental Manufacturing (BDM)'s Fluoride Foam won't cause your patients to gag. It's five light flavours are dispensed in colorful, patient friendly containers that go as far as three pints of gel or cream! Treat your next patient with a pleasant treatment of BDM's New Fluoride Foam.

Presented by Bolton Dental Manufacturing

9:50 a.m. — ORBIT LC

A new technology with respect to shade selection and communication. Presentation to include slides, models for viewing and literature.

Presented by GC America Inc.

10:10 a.m. — THE PROSTHOFLEX SYSTEM

A new and innovative method which uses a computerized automatic injection device to produce precision fitting full and partial dentures. The non-toxic polycarbonate resin is totally free of monomer and cadmium free colourant.

Presented by Ash Temple Limited

10:30 a.m. — WATER PIK Professional Dental System WATER PIK PLUS Plaque Control System

**Dynamo Prophylaxis Cups and Disposable Prophylaxis Angles
Splash Shields — Protective Faceware**

Presented by Teledyne Water Pik

10:50 a.m. — T1 TITANIUM TE 200/T1200 — A New Dental Preparation System

The new contra angle handpieces running at 200,000 rpm. This system offers:

- Enormous speed range and optimal torque
- Great tactile feeling — high cutting efficiency
- Excellent material — perfect ergonomics
- Exemplary hygiene • Brilliant illumination

Presented by Siemens

11:10 a.m. — SENSOR PIEZO: The New Generation Ultrasonic

Traditionally hand instrumentation has been the standard for root preparation and was the standard by which all others were judged. The new era of instrumentation is ultrasonics and it is proving to be kinder to the root surface, patient and operator.

Presented by Pro-Dentec Canada

11:30 a.m. — THE GREEN TEAM

A presentation on kinder, safer asepsis products for the dental office in the 90s. Gentle, yet effective, not only in the office but also for the environment. Surface disinfection, ultrasonic cleaning, instrument immersion and evacuation systems will be discussed.

Presented by Patterson Dental Canada Inc.

CONGRATULATIONS!

Each year the Faculty of Dentistry, University of Toronto, awards prizes donated by The Toronto Academy of Dentistry to two outstanding undergraduate students.

The 1994 Winners are:

Dr. J. Eric Selnes

Award in Paedodontics — 4th Year

Mr. Lance McIntosh

Award in Community Dentistry — 3rd Year

Honourary Life Membership

John E. Speck
D.D.S., Dip. Perio, F.R.C.D.(C)

In recognition of his contributions to his community and his profession, the Toronto Academy of Dentistry proudly presents its most respected award, Honourary Life Membership, to Dr. John Speck.

Over the 50 years that John has spent in dentistry, he has carefully balanced his career to include significant contributions in the fields of teaching, research and practice. In this regard he was such a chameleon and so industrious, that it was often difficult to perceive that he was not involved full time in any one of those entities.

The overriding impression that John has left in the conduct of all these endeavours is one of quite a bit of control. Obviously it requires a particular discipline of mind and manner in order to leave such an impression. John's many students and friends can attest to the quality of his approach and the model it offered for them.

One exemplification of this relates to his annual sailing race with Sid Golden in which they each selected a stew crew. John feels that Sid's present status as a principal racer at IYC is largely because of the training he received inconsistently following John's boat around the marker buoys.

John was born and raised in Toronto and graduated from the University of Toronto, Faculty of Dentistry with his D.D.S. degree and later his Diploma in Periodontics. Immediately he became a teacher, then an assistant professor and later in 1971, the Chairman of the Department of Periodontics, a post he held until 1988. He became Professor Emeritus in 1990.

Concurrently John pursued research, and he has accumulated over twenty published papers, journal articles and chapter inclusions.

Probably John's most significant contribution to the science of dentistry in general and to periodontics in particular relates to his knowledge, research and practice on occlusion and temporo-mandibular joint pain dysfunction syndrome. Throughout years of other short lived theories and practices, John maintained a conservative approach that in the final judgement was the sensible one.

continued

Recognition for his academic contributions has been manifold. John is an Honourary Member of the Canadian Academy of Periodontology and the Omicron Kappa Upsilon Honour Dental Fraternity; a Life Member of the CDA and the RCDS (Canada), as well as recipient of the Award of Merit of both the U of T Faculty of Dentistry and the CDA.

However, John's work was hardly his full dimension. As mentioned, he pursued a fervent tack as a sailor, raised a fine family of two boys, Michael and David and now has settled into retirement. His time is spent variously in bird watching, gardening, grandchild sitting and computer struggling. With a wealth of courses nearby, John is considering taking up golf. Throughout all these years John has been devotedly supported by his wife Yvonne.

The accepting of a new challenge comes naturally. John has always worked standing up because that undoubtedly gave him the mobility to cover the extensive ground that he set out for himself.

Again the Toronto Academy of Dentistry is proud to present this quiet, patient and dedicated professional, John Speck, with its Honourary Life Membership for 1994.

RCDS CREDITS FOR WINTER CLINIC

You will receive 3 credits for attendance at Winter Clinic.

You can attain 3 additional credits for any half or full day lecture.

(The system for recording these credits will be announced at the lectures)

The total RCDS credits to be allotted for Winter Clinic is 6.

Table Clinics

Room 201BDF

2:30-5:00 p.m.

1. Dr. Elliott Schwartz and Dr. Ray Shugar
"Monitoring the Sedated Patient"
2. Mr. Dave Deeley, Patterson Dental Canada Inc.
"Killing With Kindness"
3. Mr. George Kohany, APG Computing
"Software Integration in the Dental Practice"
4. Mr. James Wegg
"Canada Dentistry Fund"
5. Clinician TBA, Ivoclar North America
"TBA"
6. Dr. Josh Fedder
"Porcelain Laminate Veneers: Update"
7. Mr. Jack Dehovagimian and Mr. Steve Johnson, Canadian Dental Supply
"Compressor — Air Quality Diagnosis and Vacuum System Maintenance"
8. Mr. Andre Theberge, R.D.T. and Mr. Jamie Matera, R.D.T., Metro Dental Laboratory
"Prosthetic Management"
9. Mr. Mark Peters, R.D.T.
"Anatomically Correct Implant Design For The Single Crown"
10. Mr. Andre Dagenais, R.D.T., Posen & Furie Dental Laboratory
"Removable Partial Prosthesis Options"

Creating Esthetic Excellence—Part I A Complete Approach

Frank M. Spear
D.D.S., M.S.D.
Tacoma, Washington

SYNOPSIS

Achieving esthetic excellence in the debilitated dental patient is one of the most challenging tasks dentists undertake. It requires a blending of treatment planning, technical excellence and artistry. Dr. Spear's course provides a systematic approach to diagnosing and treatment planning any esthetic problem, knowing when other disciplines may be necessary to help solve them, and the techniques needed to complete treatment.

Course Outline

1. ESTHETIC PROBLEM SOLVING

- Diagnosing and treatment planning dentofacial esthetics
- Identifying the five keys in an esthetic result

2. CREATING THE CORRECT ENVIRONMENT FOR ESTHETIC RESTORATIVE DENTISTRY

- Esthetic, biologic, and restorative considerations in pre-restorative periodontics
- Sequencing of periodontics for optimum esthetics
- Pontic adaptation and ridge modification

3. ALTERING TOOTH PREPARATION TECHNIQUES TO FIT THE NEEDS OF THE PERIODONTIUM AND RESTORATION

- Fundamental concepts in tooth preparation
- Esthetic and structural requirements of different restorative systems — metal ceramic, all ceramic, resin
- Predictable tissue management — Placing your margin where you want it without offending the soft tissue

Dr. Spear maintains a private practice limited to fixed prosthodontics in Tacoma, Washington, and is a clinical Associate Professor at the University of Washington. He co-founded CRE Inc., Creating Restorative Excellence, which has developed a comprehensive didactic and clinical teaching program. He has lectured extensively and is the section editor on esthetic dentistry for Quintessence International.

REDUCED REGISTRATION FEES — Use the enclosed registration form or register at the Winter Clinic.

6 RCDS CONTINUING EDUCATION CREDITS

1994 Toronto Dental Golf Classic

This year, the Toronto Academy of Dentistry and the North, East and Central Dental Societies of Toronto, worked together to present the Second Annual Toronto Dental Golf Classic, which took place at Glen Eagle Golf Club.

Once again, the tournament was a fundraising function, and with the presence, efforts and sponsorship of both the profession and the dental industry, we were able to make a sizable donation of **\$12,000** to The Hugh MacMillan Children's Foundation. This is a wonderful rehabilitation centre for both adults and children, and we can be sure that our contribution is going where it is needed.

The golf tournament was a great success; the participants enjoyed beautiful golfing weather, and an opportunity to socialize with their peers. As well as the regular golfing, there were additional activities, such as the putting and longest drive contests, plus prizes for a hole-in-one and for our senior golfers. During dinner, the excitement was almost tangible, as raffle tickets were drawn, and three lucky people won great prizes: a baseball and bat signed by Roberto Alomar, a limited edition lithograph donated by Irwin Toys, and a luxurious weekend for two at Caesar's Palace in Atlantic City!! However, even those who did not win, continued to smile as they were entertained at dinner by the witty Don Harron.

The Committee of The Toronto Dental Golf Classic thanks the following companies for their support.

Mediations Report

The component societies of the Ontario Dental Association in Toronto with the assistance of the Toronto Academy of Dentistry have been quite successful in addressing the problems between patients and dentists. Our process, which is limited to those cases that do not involve malpractice, fraud or unprofessional conduct, is more flexible than the procedures followed by the Royal College of Dental Surgeons. Mediations is provided to all members at no cost to them or to the person initiating the complaint. The recommendations by our Mediations Committees are not binding to either party, but merely attempts to resolve the problems before escalating to a formal hearing. Many of the problems we are asked to resolve are the result of poor communication between the dentist and patient. In the event that the nature of the complaint is beyond the scope of our committee, or the suggestions are not acceptable to either party, the patient is advised to consult the RCDS.

We must not forget our obligation to our patients. They come to us for dental care and it is our responsibility to inform them of the condition of their dental health and provide treatment advice and options where relevant. The treatment we provide should always be in the best interest of the patient and not motivated by financial gain. Occasionally we must put aside our egos and refer care to a specialist who may have greater ability and understanding to treat a problem. By so doing, we and the patient can have confidence knowing that the care given is of the highest standard recognized by the profession. In offering treatment we must look at new techniques and technology with caution and even suspicion. Trust therapies that have stood the test of time rather than those with incomplete research and those with the jury still out.

The members of our Mediations Committees spend a great deal of time on our behalf and for this I extend our thanks. As well I would like to make special mention to Mrs. Patricia McCance and Mrs. Raisyl Wagman for acting as liaison between our members and our patients.

Gilbert Chapnick, D.D.S.
Mediations Consultant
to the Toronto Academy of Dentistry

Past Presidents of the Toronto Academy of Dentistry

The Past Presidents of the Toronto Dental Society are identified as Past Presidents of this Academy. Below is a list of Past Presidents from 1891 to 1994.

1891-92 N. Pearson*	1943-44 Charles McLean*
1892-93 J.B. Willmott*	1944-45 Harold Skilling*
1893-94 N. Pearson*	1945-46 Harold Swales*
1894-95 W.H. Wunder*	1946-47 H. Colton Bliss*
1895-96 G.S. Martin*	1947-48 F. Harold Shepherd*
1896-97 H.E. Eaton*	1948-49 Joseph H. Johnson*
1897-98 J.J. McDonagh*	1949-50 Edgar A. White*
1898-99 J.E. Wilkinson*	1950-51 Earl Bancroft*
1899-1900 J.B. Willmott*	1951-52 Mark G. Boyes*
1900-01 A.E. Webster*	1952-53 J. Gordon Chalmers*
1901-02 F.D. Price*	1953-54 Elmer J. Herderson*
1902-03 W.E. Willmott*	1954-55 W. James Smith*
1903-04 G.S. Martin*	1955-56 J. Bevan King*
1904-05 C.E. Pearson*	1956-57 Harvey Milburn*
1905-06 W.G.L. Spaulding*	1957-58 Robert W. Marshall
1906-07 J.B. Willmott*	1958-59 William A. Weir*
1907-08 R.G. McLaughlin*	1959-60 James A. Bigelow
